

Global exposure

Two students of J K Lakshmipat University, Jaipur, have been selected by the department of information technology and communication, Government of Rajasthan, to undergo a Rajasthan student start-up programme in the Silicon Valley, USA. They are computer science engineering final year student Sarthak Vijayvergia and third year electronics and communication engineering student Harshita Gupta.

Vijayvergia and Gupta are two of a 100 students out of 7000 to be selected for the two-week residential programme at one of the leading institutes in the Valley. Through this opportunity, they are expected to learn various aspects of entrepreneurship and the process of building a tech product startup from renowned experts in the global startup ecosystem.

There they will attend a number of workshops hosted by Google, the North Eastern University, UC Berkley and 42 Coding School, and will also visit the offices of Facebook and Google, the Intel Museum, the Computer History Museum, the Golden Gate and Pier 39.
