JKLU Innovation Challenge

Applications are being invited for JK Lakshmipat University Innovation Challenge, a competition that encourages the school students with novel ideas to think about problem solving and innovation. The challenge is open to the students of classes XI and XII of schools around India. The JKLU Innovation Challenge is themed at “Finding solutions for tomorrow, today”. The participants must provide innovative solutions to achieve for the any one or more of the 17 Sustainable Development Goals (SDGs) defined by the United Nations Development Programme for the year 2030, to make a difference at the world, national, state, city or community level.

The format of the competition is such that students, guided by their teachers and mentors, will describe, conceptualise, and build on an innovative idea in selected areas of social importance. Students can further give shape to their ideas through prototyping and by demonstrate them.

The best teams will get awarded with prizes worth **Rs 5 lakh**. Along with this, the enthusiastic participants get to attend **workshops on problem-solving and innovative 21st-century technologies**.
