

JK LakshmiPat University, Jaipur  
Institute of Management  
END TERM EXAMINATION (April 2024)

Programme: BBA – Sem II Course Code and Title: ID1115: Business Mathematics & Statistics  
MM: 30 Marks Time: 2.5 Hours

*Instructions: All questions are compulsory. Statistical Table is provided overleaf.*

1. Differentiate between following with suitable examples: 6  
a) Discrete vs Continuous Variables (LO5)  
b) Descriptive vs Inferential Statistics  
c) Population vs Sample

2. In a class of 50 students, 30 students drink tea, 20 students drink coffee, 10 students drink both tea and coffee. Find the number of students who: 6  
a) Drink only tea (LO1)  
b) Drink only coffee  
c) Drink either tea or coffee  
d) Neither drink tea nor coffee

3. Marks obtained by 15 students in an examination are as under: 6  
(LO2)

|    |    |    |    |    |
|----|----|----|----|----|
| 88 | 82 | 72 | 78 | 72 |
| 60 | 82 | 96 | 86 | 88 |
| 88 | 87 | 89 | 85 | 95 |

Compute the mean, median, mode and standard deviation for the above dataset (rounded up to two digits after decimal point).

4. If the runs scored by a batsman in his T20 career are normally distributed with an average of 40 and a standard deviation of 8 then find the probabilities that he scores following runs in a randomly selected match: 6  
a) Above 50 (LO3)  
b) Below 30  
c) Between 30 and 60  
Also sketch the corresponding normal curves.

5. Runs scored and balls faced by five players in a T20 match are as under: 2+4

|             |    |    |    |   |    |
|-------------|----|----|----|---|----|
| Runs Scored | 54 | 82 | 23 | 8 | 20 |
| Balls Faced | 43 | 53 | 12 | 7 | 4  |

- (LO5)  
a) Draw a scatter plot and comment upon the relationship between runs scored and balls faced?  
b) Compute the Pearson's correlation coefficient for the above data and interpret the findings.

## STANDARD NORMAL TABLE (Z)

Entries in the table give the area under the curve between the mean and  $z$  standard deviations above the mean. For example, for  $z = 1.25$  the area under the curve between the mean (0) and  $z$  is 0.3944.

| z   | 0.00   | 0.01   | 0.02   | 0.03   | 0.04   | 0.05   | 0.06   | 0.07   | 0.08   | 0.09   |
|-----|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| 0.0 | 0.0000 | 0.0040 | 0.0080 | 0.0120 | 0.0160 | 0.0190 | 0.0239 | 0.0279 | 0.0319 | 0.0359 |
