

Rajasthan govt to start 'Guru-Shishya' programme

Jaipur: The Rajasthan government will 'soon' introduce 'Guru-Shishya' programme in all districts, under which college students can discuss with their teachers the issues and problems related to their institutes.

According to state Higher Education Minister Kiran Maheshwari, the programme will be held in one nodal college in each district where students selected on merit and elected members of students union would participate.

It will soon begin from Jaipur, she told reporters in Jaipur.

Highlighting the achievements of her department ahead of fourth anniversary of the BJP government in Rajasthan on December 13, the minister said college and university infrastructure have been strengthened and new innovations introduced to improve quality of education.

She said the new technical university in Bikaner would start functioning from next academic session and a new board for engineering college would be formed.

"New courses in technical education will also be introduced," Maheshwari said. **PTI**
