JK LAKSHMIPAT UNIVERSITY

Exploring educational excellence

Turning knowledge into wisdom, and information into workable ideas: This was the driving force behind the creation of the multi-disciplinary JK Lakshmipat University (JKLU). The university was set up in Jaipur in 2011 with the aim of giving students cutting-edge holistic learning and developing promising youngsters into the leaders of tomorrow, with globally relevant, future-ready and actionable intelligence. The university has excellent infrastructure, a dynamic faculty with a healthy mix of the experienced and the young, and a strong focus on placements for building technocrats and leaders. The curriculum assigns high weightage to internships to develop employable professionals with the cooperation of business and industry. JK Lakshmipat University has been promoted by the JK Organisation, one of the country's leading Indian Industrial Conglomerates with a heritage of more than 100 years. Through the Lakshmipat Singhanian Education Foundation and other non-profit entities, JK Organisation is strongly committed to societal needs, particularly in the fields of education, healthcare, social welfare and infrastructure development. JKLU has been inspired by the vision of its key architect, Lala Lakshmipat Singhanian, who believes that higher learning and management skills are essential for the growth of the Indian industry and economy. JK Organisation through the Lakshmipat Singhanian Education Foundation continues its mission of spreading education across the country with special emphasis on providing quality education to the masses.

TAMIL NADU

KALASALINGAM UNIVERSITY

Making education universal

To meet the growing demand for education across the country, the chancellor of Kalasalingam University, Thiru. K Sridharan, initiated the university's inception. His dream was to ensure access to education for all.

To ensure that all strata of society have equal opportunities, it was decided that the university would be located in a small town called Krishnankoil in the Virudhunagar district near Madurai, built on a green and hilly terrain that would blend with its natural surroundings and be easily accessible. The thirst to serve the students with technical knowledge also drove the chancellor to search and identify different systems of education.

The chancellor believed that one's ability to achieve goals works in tandem with proper planning, commitment and persistence. 'Be unique and think big' has been his success mantra. Today, the university maintains global standards by conducting numerous international student exchange programmes. It is a globalised centre of learning.

His father, the late 'Kalvivallal' Kalasalingam, is his greatest inspiration and having always followed in his footsteps, Mr Sridharan is now striving to make the institution one of the top universities in the country. To this end, the institute is conscious about teaching every student how to think rather than what to think.
