

JK LAKSHMIPAT UNIVERSITY, JAIPUR
INSTITUTE OF MANAGEMENT
END TERM EXAMINATION (DECEMBER 2021)
BBA-III Semester

Time: 2 Hours
MM: 30 Marks

Course: Statistical Reasoning
Course Code: ID1102

4. (Marks –5)
 A Theatre chain has studied its movie customers to determine how much money they spend on refreshments in the theatre halls and the study revealed that the spending distribution is approximately normally distributed with a mean of Rs. 411 and a standard deviation of Rs137/-. What percentage of customers will spend less than Rs. 300 on refreshments
5. (Marks – 10)
 It is observed that worldwide students who want to pursue business studies such as MBA significantly prefer an US institution as a destination of study. Most US graduate schools of business require applicants for admission to take the Graduate Management Admission Council's GMAT examination. If you are provided with a scenario that scores on the GMAT are roughly normally distributed with a mean of 520 and a standard deviation of 100. What is the probability of an individual scoring below 545 on the GMAT? If 725,000 candidates have taken GMAT examination, how many might have scored a score less than 545? (5)
- 5.1 What is the number of students corresponding to the 50th percentile? (2.5)
 5.2 What is the number of students scoring between the 50th percentile and the 95th percentile of GMAT scores? (2.5)

Annexure- Tables
