

STORY OF THE HOUSE OF J. Ks.

Late Lala Jagdish Singhania

Brick-layers Of Gigantic Edifice

IN THE INDUSTRIAL LIFE OF India there is hardly any sector to which the J. Ks. have not made their contributions. Why was the name "J. K." selected for the House? The vast industrial House of the J. Ks., as it obtains today, certainly could not have been built overnight. Who then were the early brick-layers of this gigantic edifice?

The history of the House is the history of the Singhania family. Originally, the forefathers of the present Singhania family resided in the village of Singhaia in Jaipur State, some time in the middle of the 18th century. The family is known by Singhaia gotra among Marwari Agrawals and is called Singhaia, named after the village of Singhaia.

EARLY BEGINNING

About 150 years ago, in the latter part of the 18th century, Balu Singh Ram, living in the village of Singhaia, left for Farrukhabad to participate in the expanding business life of that city. Starting as a banking house, branches were opened at Calcutta, Kanpur, Morarpur and Banaras. The early forebears of the Singhania family came from Morarpur to Kanpur about 100 years ago. Lala Baldevdas is the first prominent figure who came before us as a builder.

The J. K. Industries have also built the G. N. K. High School, Kanpur, which has been elevated in the status of a college. The Kailashvi Hall in the R. D. College, Kanpur, has also been constructed by the J. K. group. Besides, literary classes for workers and their children are held in the mills and factories and lectures on various subjects delivered with the help of magisterial slides, films and loud speakers. The subjects relate mainly to penmanship, hygiene, cleanliness, discipline, sanitary habits, punctuality and co-operation.

The J. K. Charitable Trust is awarding scholarships to the extent of Rs. 35,000 every year to students presenting their studies in colleges and universities in India.

The Trust has also donated a sum of Rs. 6.5 lakhs towards the construction of the J. K. Institute of Applied Physics at the University of Allahabad and the J. K. Institute of Sociology and Human Relations at the University of Lucknow. The foundation stone of the J. K. Institute of Applied Physics was laid by Sir Fudampat Singhania, Governing Director.

The progenitor of the present survivors, Lala Juggal, the sixth son of Lala Baldevdas, had three sons, the eldest of whom was Lala Kamalpat.

The year 1863 marked the silver jubilee of the business activities which started from humble beginnings. The family tree, like its business, expanded as years rolled by, and in the year 1921 the firm of Messrs. Baldevdas Juggal Kamalpat, after this progress and development have indeed been phenomenal.

The first leg of the J. K. symbol, then in Lala Juggal, and the second, Kamalpat, Kamalpat, the thirty son of Lala Juggal, born, trained his three sons, the well-known

Singhania Brothers, who together have contributed a lion's share in the development of what is known today as the House of J. Ks.

The Singhania were carrying on extensive business in sale and distribution of agricultural commodities and lending money to agriculturists. When they came to Kanpur, in addition to their family business they began to interest themselves in supplying raw products and selling the finished goods of several textile mills in Kanpur. The 1906 (Chait Sudi Navami) Sankranti (1922), Baldevdas Ramnath was the manager of the firm run by them. It comprised one jute mill, one Hydroelectric Frezzer Association, three spinning factories and two flour mills. They were also selling agents for the Cawnpore Cotton Mills and commission agents for the Victoria Mills and Elgin Mills (then known as Parana Pailghat).

PROGRESSIVE OUTLOOK

After 1905 Sankranti, the J. K. family branched off into the firm of Baldevdas Juggal and Baldevdas Kadamnath. The firm was also the cashier of the Imperial Bank in Bengal. The firm of Baldevdas Juggal and Baldevdas Kadamnath was progressive in its outlook. Half of the funds was given to Lala Juggal and half to Lala Kamalpat. Lala Juggal at that time was the Selling Agent to the Cawnpore Cotton Mills and the Victoria Mills Co. Ltd. His firm also started a piece-goods department and imported cloth from England, in partnership with Lala Bhagvandas. The firm also owned a spinning factory in Madhugai.

The year 1918 might well be taken to be the turning point in the family's fortunes and an augury for the country's economic development, because Lala Kamalpat Singhania, a man of magnificent vision and enterprise, chose the family's industrial undertaking as his share.

BUSINESS SACRIFICE

These were days of great upheavals and national awakening, when the non-co-operation movement was in full swing. Boycott of foreign goods was the order of the day. Lala Kamalpat was fired with the ambition of setting India as an industrial country, self-supporting in manufactured goods. To fulfil this ambition, he sacrificed his business of purchases and selling agents and wholeheartedly entered the industrial field. He laid well and truly the foundation of an edifice which today has become a household word.

The foundation of the J. K. Cotton Spinning and Weaving Mills Co. Ltd. was laid by Lala Kamalpat, the illustrious originator of the J. K. group of mills in 1921, and it is truly said that the history of the J. K. Cotton Spinning and Weaving Mills Co. Ltd. is the history of the J. K. group. The mother mill has given birth to scores of ventures which are now and then like the Banyan tree.

Lala Kamalpat experienced

with the manufacture of quality goods from Indian cotton to stand out if the same could withstand foreign competition. He installed a dyeing and printing section which was a pioneering effort in the U.P. to manufacture prints, J. K. prints, black chintz and saris captured the market and were in extensive demand. Lala Kamalpat, during his life time, established the Kamla Ice Factory (1921), the J. K. Cotton Mills (1921), the J. K. Hosiery Factory, Kanpur (1929), the J. K. Jute Mills (1931), the M. P. Sugar Mills (1931), the J. K. Cotton Manufacturers (1933), the J. K. Hosiery Factory, Calcutta (1934), and the J. K. Iron & Steel Co. Ltd. (1934); incorporated on April 24, 1935.

EXTENSIVE

From a banking house to a trading house, and from a trading house to modern large-scale industrial ventures supported by modern finance and banking, is indeed a far cry. Today the ramifications of the House of J. Ks. are extensive, far-flung and wide. In the U.P. ton, the J. Ks. have established an office. There is hardly an important industry in India, where their ventures have not spread. Business, trade and industry developed in such gigantic proportions that it was ultimately felt necessary to establish better and effective control-centres in the three zones of India: the North zone, Kanpur, the East zone, Calcutta, and the West zone, Bombay.

The eldest among the three Singhania brothers, Sir Fudampat, the Governing Director of the J. K. Industries and in charge of the Northern zone; the second, Lala Kamalpat, Director-in-charge of the Western zone, and the youngest, Lala Lakshmi Pat, controlling the Eastern zone.

Cotton and hosiery, jute and wool, iron and steel, aluminium plastic and plywood, straw products, silk, soap, tea, vanaspathi, flour, sugar, chemicals and rubber, import and export and real estate, banking and insurance, are some of the important lines of the industrial, trading and financial ventures of the House of J. Ks.

IMPOSING ARRAY

The J. K. concerns today present an imposing array of leading industries. The broad-print of

the J. K. Industries has room for further ventures. These concerns are by no means small enterprises. Crores of rupees have been sunk which provide livelihood and means of better living to a large section of our overpopulated India. This federal industrial institution consists of over 50 concerns whose assets exceed Rs. 500 million, employing over 45,000 persons. That all this should have been achieved by the J. Ks. in the space of less than 32 years, speaks volumes for the vision, organising ability, courage and sound business acumen of those who guide its fortunes.

While building up their industrial ventures the J. Ks. have not forgotten to carry on unflinching by their traditions for charity. They have built up magnificent temples and dharmshalas, founded a large number of schools, offered scholarships to deserving students for study and research, and instituted facilities of learning in universities.

The J. K. group of industries is an Indian enterprise, first, last, and always.

The J. K. Jute Mills have also established an Ugami and an Ayurvedic dispensary. All major mills and factories have their own canteens and grain-shops where approximately 25,000 to 30,000 and 40,000 people, respectively, take advantage of such facilities. One of the most modern clubs for workers, the KAMLA CLUB at Kanpur, provides facilities for all major indoor and outdoor games, where nearly 1,000 workers participate in the annual sports.

EASTERN ZONE, CALCUTTA THE TRIUMPH OF INDIAN VENTURE

THE Eastern Zone looks after the interests of J. K. Industries, with their head office at 7, Connel House Street, Calcutta, in so far as the mills and factories are situated in Bengal Bihar and Orissa.

The local mills and factories at central of the Eastern zone of the Eastern zone are in the following order: The J. K. Cotton Mills, the J. K. Hosiery Factory, the J. K. Jute Mills, the J. K. Iron & Steel Co. Ltd., the J. K. Sugar Mills, the J. K. Chemicals, the J. K. Soap, the J. K. Vanaspathi, the J. K. Flour, the J. K. Tea, the J. K. Rubber, the J. K. Aluminium, the J. K.
