INSTITUTE OF MANAGEMENT
END TERM-II EXAMINATION (MAY 2022)
BBA-VI Semester

Time: 1.5 Hours

Marks: 20

Course: Social Project

Course Code: PW1105

Read the passage news excerpt below and answer the questions:

It was yet another year of extreme weather events across the country. A rare rock and ice avalanche triggered flash floods in Uttarakhand in February. More than 200 people died or went missing. Unusually heavy rains and subsequent landslides in Uttarakhand in October claimed more than 50 lives. Floods in western Maharashtra claimed more than 250, and destroyed large expanses of standing crops. India in fact reported two of the top 10 most expensive extreme events in the world, both in May: Cyclones Tauktae, which lashed the west coast and affected Kerala, Tamil Nadu, Karnataka, Maharashtra and Gujarat, and Yaas, which left more than 1.5 lakh people homeless in eastern India. Together they caused losses amounting to around Rs 33,472 crore in four countries. A flagship UN climate report said India should brace for more such events in future.
