

● INNEFU LABS

Reducing cyber risk with AI

This Delhi-based AI startup develops cybersecurity solutions for defense research labs, state police departments and intelligence agencies

SUDHIR CHOWDHARY

INNEFU LABS, A New Delhi-based startup which develops cybersecurity solutions using Artificial Intelligence, has been chosen by Nasscom's Data Security Council of India (DSCI) as the security product company of the year 2018, alongside some of the established industry biggies such as IDFC Bank, Infosys and MakeMyTrip. The clients of the firm include defense research establishments, state police departments, intelligence agencies, banks and paramilitary organisations including Border Security Force (BSF), and Indian army. Earlier this year, the startup's trademark product was used by the Delhi Police to identify 3,000 missing children.

A fast-growing company in the cyber-

security products space today, Innefu was founded in 2011 by IT engineers Tarun Wig and Abhishek Sharma with a goal to develop India's own security

Going by the ever-evolving cyber security threats, we believe that the future of war is digital. Innefu was founded on the belief that when the next war is fought in the cyberspace, we need our own weapons

— **TARUN WIG,**
CO-FOUNDER, INNEFU

products. Says co-founder Abhishek Sharma, said, "We are proud to be recognised by Nasscom's DSCI. As one of the first Indian startups in the niche domain
