JK LAKSHMIPAT UNIVERSITY, JAIPUR RE-IMAGINING EDUCATION

Dr. R L Raina
Vice Chancellor

JK Lakshmipat University, Jaipur is reimagining education to provide future-ready, experiential learning based programmes to its students. A philanthropic initiative of the JK Organisation, their unique curriculum enables students to learn by doing, draws from the best from India and the world, and focuses on their holistic development into competent professionals in the 21st Century. In the academic year 2018-19, by transforming various aspects of their pedagogy and environment, the University is offering high-quality programmes in India at a very affordable cost.

JKLU's new B.Tech curriculum has been redesigned with Olin College of Engineering, USA, to bring cutting-edge project based learning methodology, which helps students build technical as well as personal skills that are known to contribute to professional success. For its flagship MBA programme, aptly called the "Pinnacle MBA", JKLU has developed powerful industry-integrated curriculum architected by Dr. Pramath Raj Sinha, Founding Dean of ISB, Mr. Asheesh Gupta, former senior

McKinsey consultant, and Dr. RL Raina, former Dean of IIM Lucknow. Students in this programme will be taught and mentored by leaders associated with IIMs, Wharton, Kellogg School, McKinsey, Amazon, J&J, Mahindra, etc. They will also have the option to receive certification from the prestigious Wharton School, University of Pennsylvania, USA.

To focus on building new-age capabilities in the students, JKLU has also established four Centres of Excellence focusing on areas of communication, Operations, Data Sciences and entrepreneurship. The University was also one of the only 72 institutions selected by Niti Aayog out of 2,700 applicants across India, alongwith IIT Delhi, JNU Delhi, IIFT, etc, in the Atal Incubation Mission. This will enable students to access grant and support for innovation and startups over the next five years.

In keeping with the vision of its founders, JKLU offers a number of merit scholarships each year to deserving students. The University is, therefore, determined to shape confident and competent young professionals, ready not just for a job but for a life.
